GEDA REMOVAL HOIST

Designed for furniture removal and the transport of boxes originally, the GEDA Removal Hoist is the ideal tool for renovators, installers, and fitters on construction sites. Transporting toolboxes, construction material or rubble - this handy hoist does all jobs with ease.

Three different variants are available, which can be used individually depending on the situation on site. Depending on the type, the hoist transports up to 250 kg quickly and safely up to a maximum height of 18.3 m. All removal hoist models have a small footprint – during transport and during use. Narrow pavements or tight courtyards are no problem for the GEDA removal lift.

If particularly delicate pieces of furniture or removal goods have to be transported, we always recommend using the special soft start feature which ensures particularly gentle transport.

*Terms and Conditions:

Orders must be placed between 1/10/20 - 30/11/20 to avail of this manufacturer's special price. A 20% deposit needs to be paid to secure the order during the promotional period (1/10/20 - 30/11/20).

The units will be placed with GEDA, Germany and be sea-freighted from Germany to Australia, meaning the unit will land approximately 3-4 months after order. Prices are excluding gst and ex works Hasemer.
